

IN THE CLAIMS

Please amend the claims as follows:

- 1-31. (Canceled)
32. (New) A system for providing therapy to a portion of a body, the system comprising:
a box;
a first patch held within said box, wherein said first patch applies a first therapy to the portion of the body when said first patch is placed near the portion of the body; and
a second patch held within said box, wherein said second patch applies a second therapy to the portion of the body when said second patch is placed near the portion of the body.
33. (New) The system of claim 32 further comprising a third patch within said box, wherein said third patch applies a third therapy to the portion of the body when said third patch is placed near the portion of the body.
34. (New) The system of claim 33 wherein said first patch is an exothermic heating patch and said second patch is an endothermic cooling patch, and wherein said third patch is a topical analgesic patch.
35. (New) The system of claim 32 wherein said first patch is within a first enclosure and said second patch is within a second enclosure.
36. (New) The system of claim 32 further comprising a plurality of first patches within said box.
37. (New) The system of claim 36 further comprising a plurality of second patches within said box.

38. (New) The system of claim 32 wherein said box includes a cover.
39. (New) The system of claim 38 wherein said cover is retractable.
40. (New) A system for providing therapy to a portion of a body, the system comprising:
a holder;
a first patch held by said holder, wherein said first patch applies a first therapy to the portion of the body when said first patch is placed near the portion of the body;
a second patch held by said holder, wherein said second patch applies a second therapy to the portion of the body when said second patch is placed near the portion of the body; and
a flexible wrap held by said holder, the flexible wrap being adapted to secure at least one of said first patch and said second patch near the portion of the body.
41. (New) The system of claim 40 further comprising a third patch held by said holder, wherein said third patch applies a third therapy to the portion of the body when said third patch is placed near the portion of the body.
42. (New) The system of claim 42 wherein said first patch is an exothermic heating patch and said second patch is an endothermic cooling patch, and wherein said third patch is a topical analgesic patch.
43. (New) The system of claim 40 wherein said first patch is within a first enclosure and said second patch is within a second enclosure.
44. (New) The system of claim 40 wherein said holder is a container.
45. (New) The system of claim 40 wherein said holder is a board.

46. (New) The system of claim 40 further comprising a plurality of first patches held by said holder.

47. (New) The system of claim 40 wherein said first patch and said second patch are releasably attached to said holder.

48. (New) The system of claim 40 further comprising a flexible wrap attached to said holder, the flexible wrap being adapted to secure at least one of said first patch and said second patch near the portion of the body.

49. (New) A method of providing therapy to a portion of a body, the method comprising:
removing a patch from a box that holds a plurality of patches, wherein at least one of the patches is adapted to apply a different type of therapy to the portion of the body than the other patches; and
applying the patch near the portion of the body.

50. (New) The method of claim 49 further comprising determining an appropriate therapy to provide to the portion of the body.

51. (New) The method of claim 49 wherein applying the patch near the portion of the body includes applying the patch to the portion of the body.

52. (New) The method of claim 49 wherein applying the patch near the portion of the body includes removing a flexible wrap from the box and wrapping the patch within a flexible wrap that is wrapped around the body.

53. (New) The method of claim 49 wherein removing a patch from a box that holds a plurality of patches includes removing at least two patches from the box where one of the patches provides a different type of therapy than the other patches.

54. (New) The method of claim 53 wherein applying the patch near the portion of the body includes applying at least two of the patches near the portion of the body to provide a combined therapy.

55. (New) A method of providing therapy to a portion of a body, the method comprising:
selecting a patch from a holder that holds a plurality of patches, wherein at least one of the patches is adapted to apply a different type of therapy to the portion of the body than the other patches;

positioning the patch near the portion of the body; and

removing a flexible wrap from the holder; and

wrapping the flexible wrap around the body to secure the patch to the body.

56. (New) The method of claim 55 further comprising determining an appropriate therapy to provide to the portion of the body.

57. (New) The method of claim 55 wherein positioning the patch near the portion of the body includes positioning the patch directly against the portion of the body.

58. (New) The method of claim 55 wherein selecting a patch from a holder that holds a plurality of patches includes selecting a heat patch from the plurality of patches.

59. (New) The method of claim 55 wherein selecting a patch from a holder that holds a plurality of patches includes removing the patch from a container.

60. (New) The method of claim 55 wherein selecting a patch from a holder that holds a plurality of patches includes releasing the patch from a board.
61. (New) The method of claim 55 wherein selecting a patch from a holder that holds a plurality of patches includes selecting at least two patches from the holder where one of the patches provides a different type of therapy than the other patches, and wherein positioning the patch near the portion of the body includes positioning the at least two patches near the portion of the body.
62. (New) The method of claim 61 wherein wrapping the flexible wrap around the body to secure the patch to the body includes providing a combined therapy wrapping the flexible wrap around the body to secure the at least two patches to the body.
